

ALC Software with New Languages

October 2015

The Antenna Line Configurator (ALC) for on-site AISG control can now be operated in 7 languages:

- English
- Spanish
- French
- German
- Chinese
- Arabic
- Russian

All these languages are available from ALC firmware version 2.30 onwards. The standard language on the device is English. The operation in all other languages can be performed via any laptop, tablet PC or Smartphone with the browser interface. The language is automatically set according to the language used by the browser.

The ALC firmware as well as the corresponding manuals in all 7 languages can be downloaded at our customer portal: <http://www.kathrein.de/en/mobile-communication/portal/ret-system/>

The firmware update and the browser interface functionality are described in detail in the manual. For any further information please contact your Kathrein sales partner.
